

**CLEAN VERSION OF CLAIMS**

9. A computer-based method, as defined in claim 1, wherein storing further includes storing information related to vesting of a particular attendance right option.

10. A computer-based method, as defined in claim 9, wherein vesting information includes an identification of a particular team or competitor who must qualify for a particular event.

29. A computer-based method, as defined in claim 28, wherein the step of receiving a command comprises receiving a command to purchase the option to purchase a particular attendance right at a previously-displayed offer price.

30. A computer-based method, as defined in claim 28, wherein the step of receiving a command comprises receiving a command to place a specified bid on the option to purchase a particular attendance right.

31. A computer-based method, as defined in claim 28, wherein the step of receiving a command comprises receiving a command to cancel a specified bid on the option to purchase a particular attendance right.

32. A computer-based method, as defined in claim 1, further comprising the step of receiving a command to place and maintain a bid, higher than the current highest bid, but subject to a limit, on the option to purchase a particular attendance right.
